

IGRGEA LETTER

International Geophysical Research Group /Europe -Africa

AIM OF THE LETTER

At the End of the IEEY, IGRGEA (International Geophysical Research Group Europe Africa) has been organized to follow the research work initiated during IEEY.

IVORY-COAST PROJECT

Mr V. Doumouya read his PHD in October 95, on equatorial magnetic field observations; he is preparing a "Doctorat d'Etat". He has been given a position of university assistant teacher.

Three other researchers have started preparing PHD or "Doctorat d'Etat" at the Abidjan University

Olivier Obrou (PHD) on equatorial electrojet modeling.

Jean-Pierre Adohi (Doctorat d'Etat) on Earth's magnetic field variations, are magnetic pulsations amplified at the equator ?

Etienne Guisso : Telluric field models

SENEGAL PROJECT

The CNET/Lannion HF radar has been financed by the Ministry of Cooperation; it should be set up and operated in Senegal.

Abdou S. Ndiath, in charge of the M'bour observatory has started a PhD on the Earth's magnetic field maps at Dakar University.

KORHOGO SITE

The LETTI HF radar should be set up at Korhogo during the second quarter of 1996. Mr Olivier Chiron (VSN) will take office in replacement of Mr Patrick Merrien in March 1996.

The Korhogo ionosonde data are available on request in World data Centers. A catalogue will be

issued on a yearly basis

DATA BASE

The final catalogue for the IEEY period including the 3 longitude sectors will be edited during the second 1996 semester by C. Amory-Mazaudier.

GEOPHYSICAL SCHOOL IN ABIDJAN

The School was held as planned from October, 16 to 26 1995. Nearly thirty persons (teachers and students) participated.

For each site (Universities and Observatories) an Information system will be created, with the following list of the sites and responsible persons :

Dakar University : B. Barry

Abidjan University : V. Doumouya and O. Obrou

Korhogo Observatory : E. Kone

M'bour Observatory : A.S. Ndiath

INTERNATIONAL CONFERENCES

URSI will be held from August 28 to September 5, 1996 at Lille, France.
